

AA195PM Two Hole Outdoor Pole Mounting Kit

The AA195PM mounting kit contains all hardware items required for pole mounting and weatherproofing the ESTeem for outdoor installations. The ESTeem Horizon series radios together with the AA195PM mounting kit allows the modem to be directly mounted to a round pole between 1.25" and 2" in diameter. Any pole larger than 2" in diameter will require banding through the Pole Mount Brackets.

AA195PM Parts Inventory
