

HORIZON 900 VS. EDGE 900

The **Horizon 900** is a high-performance, feature-rich device with:

- ✓ Maximum Speed in 900MHz (up to 72 Mbps)
- ✓ Self-healing MESH network capability
- ✓ Advanced networking features (router, NAT, mobile client, roaming)
- ✓ Ideal for modern, complex, and dynamic networking applications

The **Edge 900** is a robust, cost-conscious device with:

- ✓ Suitable Data-Rate (1 Mbps)
- ✓ Simplified wireless network architectures for Ethernet or legacy serial applications.
- ✓ Streamlined, highly secure wireless networking

Core Features at a Glance

	Horizon 900	Edge 900
Speed/Data Rate	Up to 72 Mbps	1 Mbps
MESH Network Architecture	+	-
Security – AES 256	✓	✓
Large Scale Networks	+	-
Modes of Operation	9	2
Ethernet and Serial Communications	✓	✓
Direct Pole-Mountable (NEMA 4)	✓	✓
Range	++++	++
